SCIENCE FOR LITTLE ONES

The Cell

Cut & Place

Ages 2+

How to use

1. Print

Print both activity pages at 100% scale. Use thick paper or cardstock for best results (200–300 gsm).

2. Cut

Cut out the individual pieces along the edges.

3. Place

Start with the easy version, where shaded guides show where each piece goes. Then try the challenge version without the guides.

4. Make it reusable

Laminate the pages and pieces, then use Velcro dots or Blu Tack to stick them on. That way your child can do it again and again.
