SCIENCE FOR LITTLE ONES

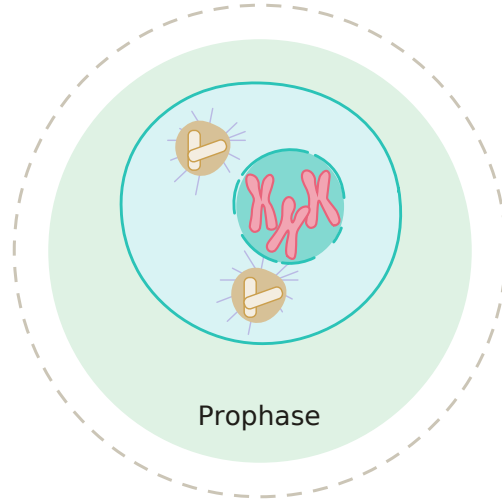

Pack 3: Mitosis

Sequence the Cell Cycle

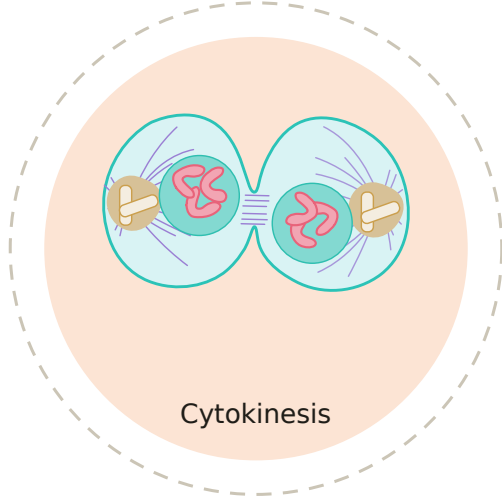

8 cards · 2 playboards · Ages 1-3

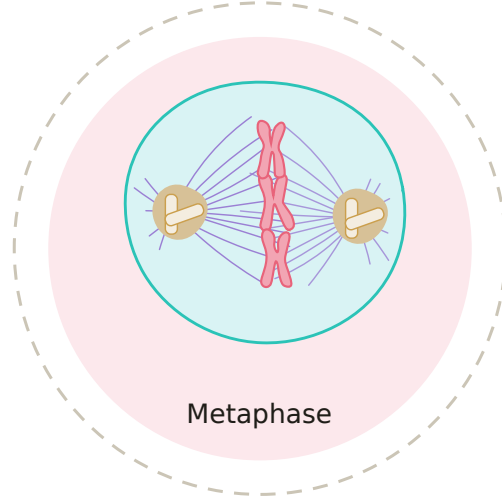

Anaphase

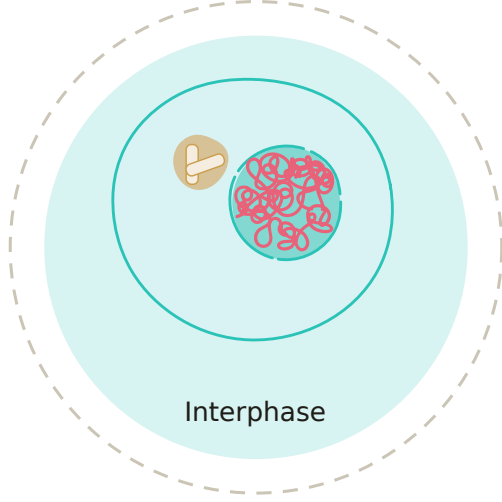

Prophase

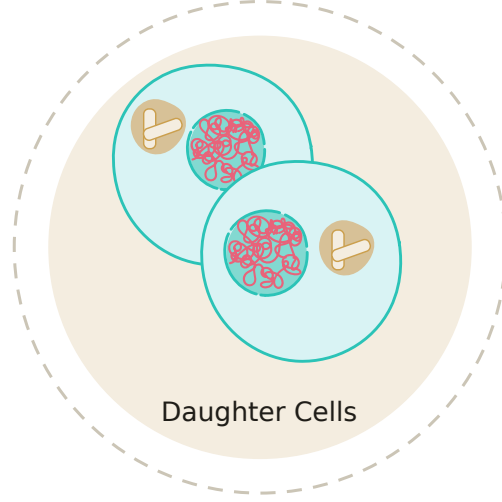

Cytokinesis

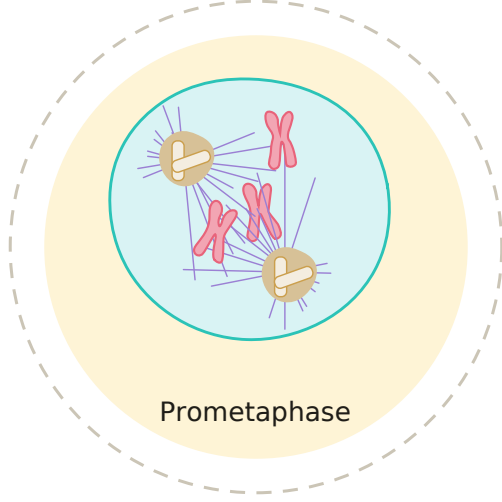

Metaphase

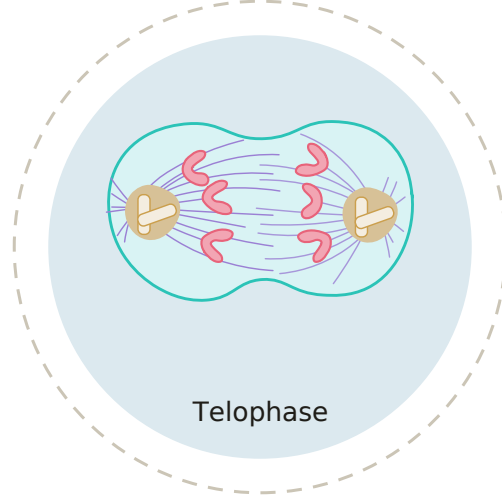

Interphase

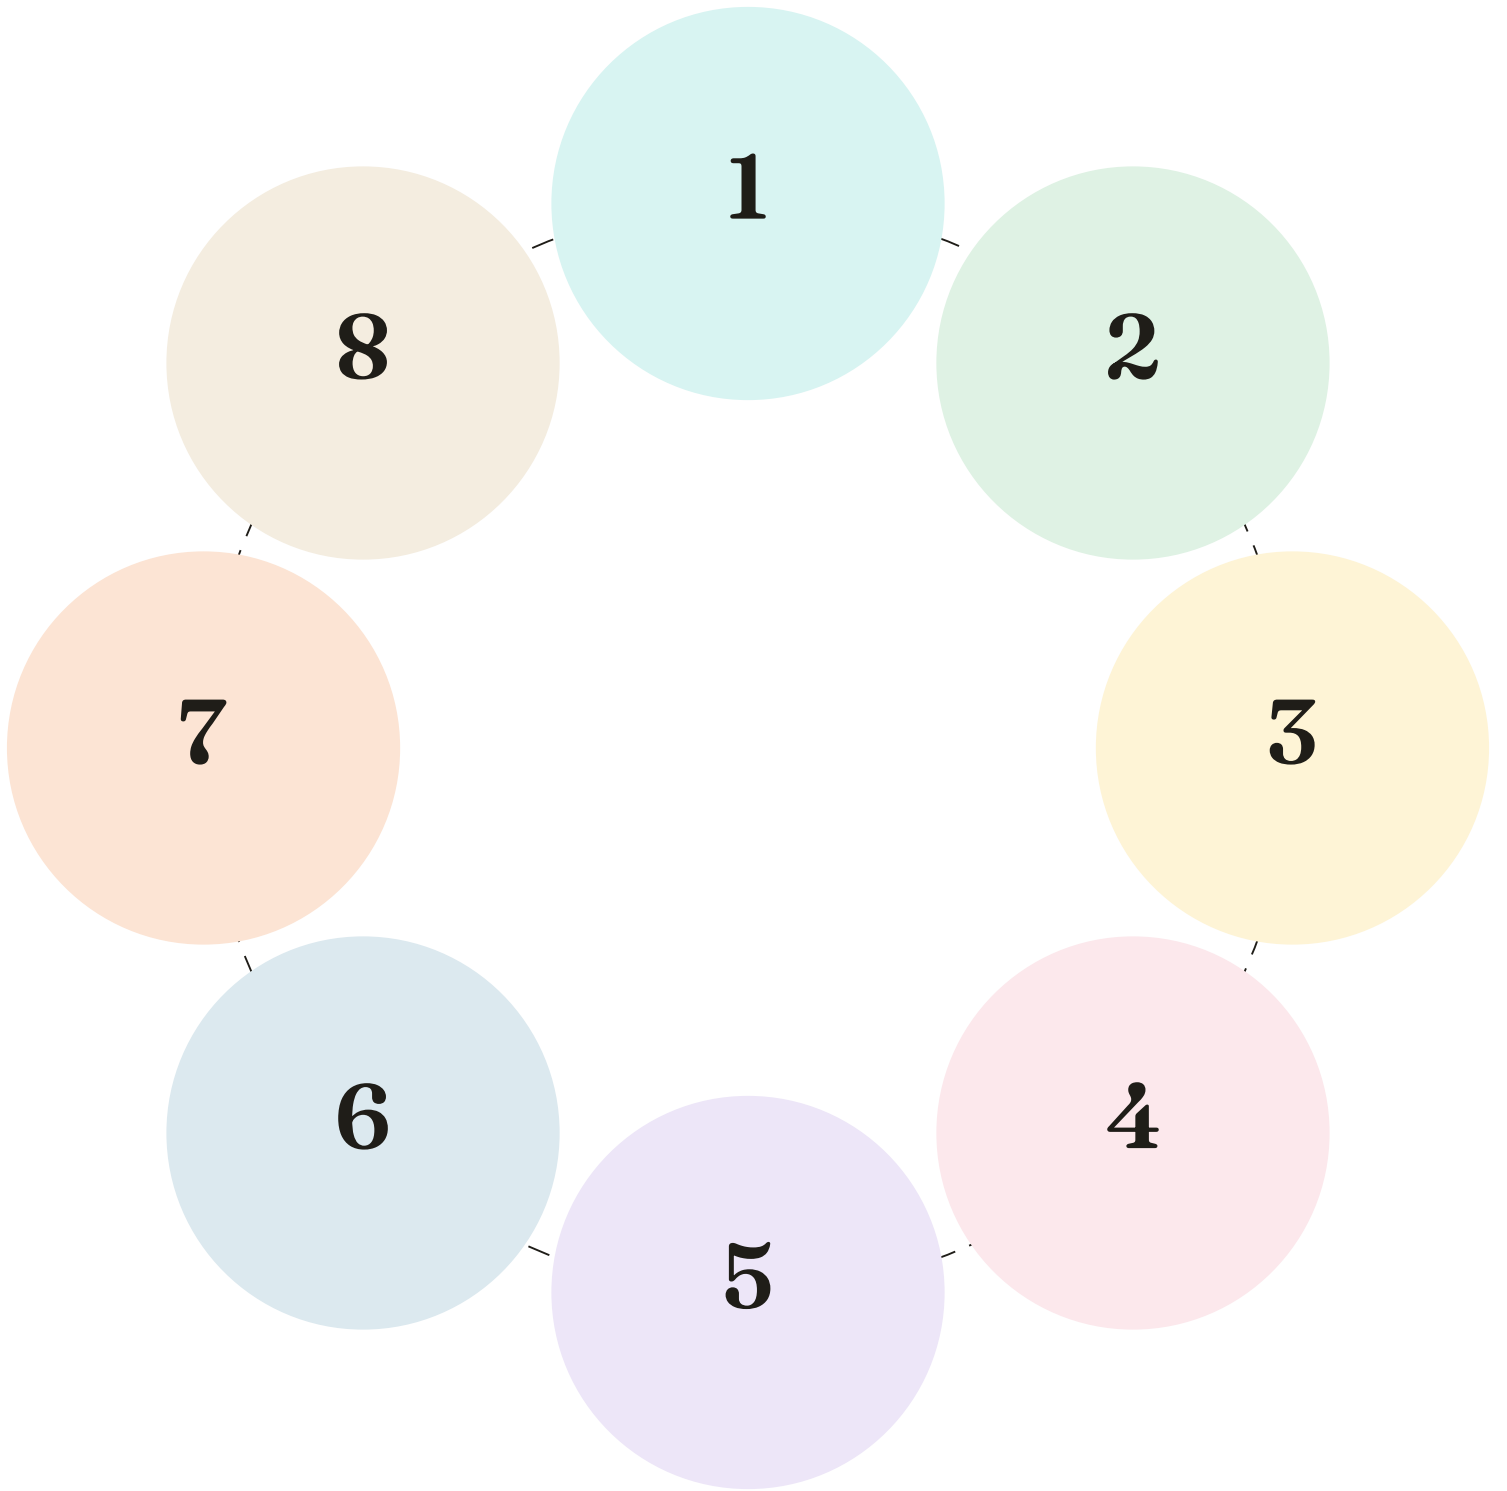

Daughter Cells

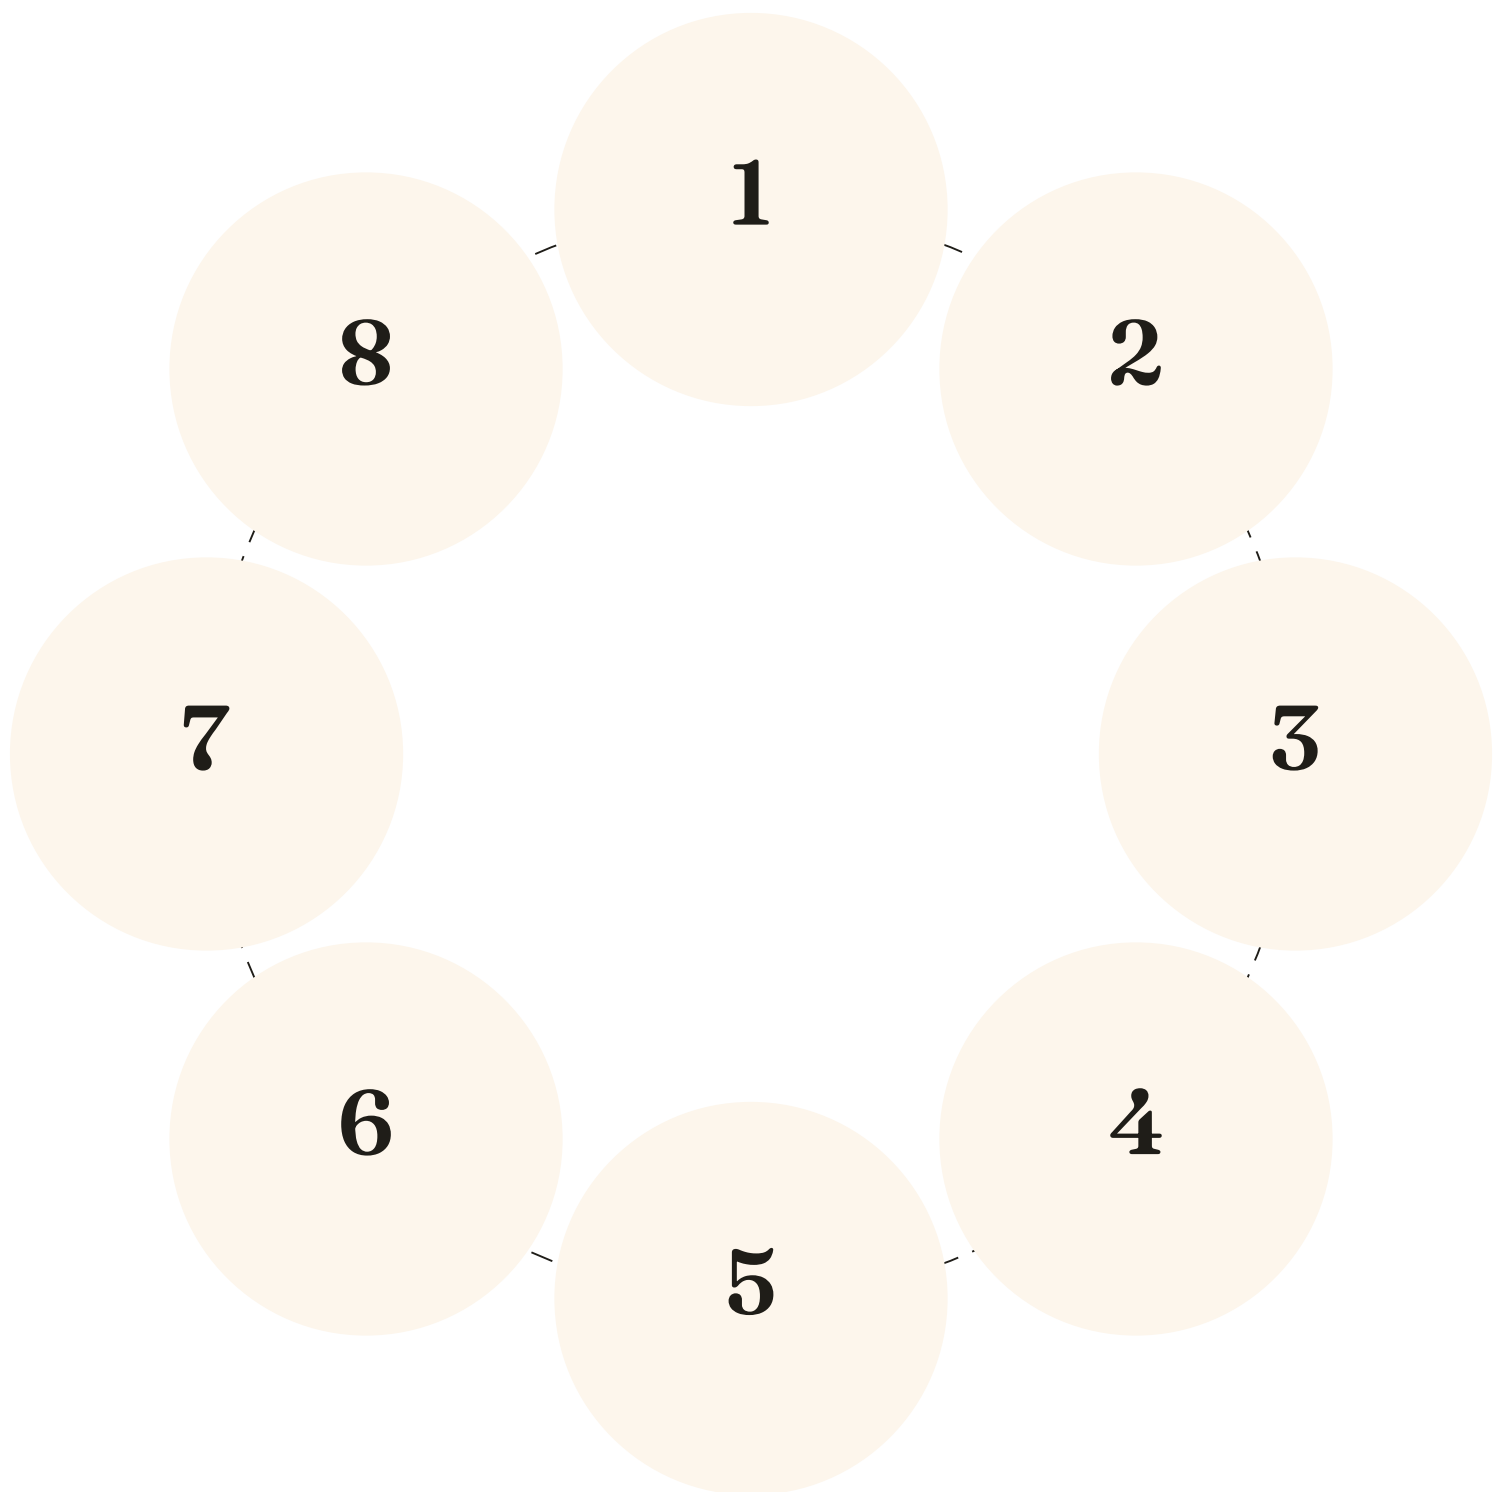

Prometaphase

Telophase

How to play

1. Print

Print the cards page and one or both playboards.
Use thick paper or card stock for best results.

2. Cut

Cut out the 8 circular cards along the dashed lines.

3. Play — color match

Use the colored playboard. Each slot is colored to match the card that goes there. Match each card to its slot and place it down, all the way around.

4. Play — full sequence

Use the plain playboard. Place each card on its number, in the order they happen, all the way around the cycle.

Tip

Laminate the cards and playboard for endless reuse.
Check the Parent's Cheat Sheet for the correct order and what each stage does.
